DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1 – 2 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 – 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Heki (US 6,200,299).

With respect to claim 1, Heki discloses a disposable undergarment comprising side edge portions, end portions, a front waist region, a rear waist region, and a crotch region (figure 1) with a pair of elastically stretchable first wings extending from the side edge portions of at least one of the front and rear waist regions (col. 7, lines 57 – 60), said first wings having a first proximal side edge portion and a first free side edge portion being provided with means to connect the front and rear waist regions to each other (7), said first proximal side edge portions being contiguous to the transversely opposite side edge portions of the crotch region (figure 1) and a stretch stress generated in the first wings as the front and rear waist regions are connected to each other is exerted upon the undergarment in a waist-surrounding direction as well as in a thigh-surrounding direction (col. 9, lines 38 – 44) and a pair of elastically stretchable second wings extending outward from the transversely opposite side edge portion of the waist region in the transverse direction (col. 7, lines 57 – 60), said second wings being placed upon said first wings so that the longitudinal upper ends of the first wings and the longitudinal upper ends of the second wings coextensively overlap each other (figure 2), said second wings having second proximal side edge portion lying on said transversely opposite side edge portions of the waist region and second free side edge portions spaced outward from said first proximal side edge portions in said transverse direction and fixed to said first free side edge portions (col. 7, lines 57 – 62), said second proximal side edge portions are non-contiguous to the transversely opposite side edge portions of the crotch region, and a stretch stress generated in the second wings as said

front and rear waist regions are connected to each other is exerted upon the undergarment in a waist-surrounding direction as set forth in col. 15, lines 45 – 57.

The first and second wings comprise extensions of the topsheet and the backsheet (col. 7, lines 57 – 60), and the first wing is considered the extension of the backsheet (thermoplastic film) and the second wing is considered as the extension of the topsheet (nonwoven fabric) as set forth in col. 8, lines 5 – 9.

With reference to claim 2, Heki discloses an undergarment wherein the a transverse dimension of the first wings is greater than a transverse direction of the second wings and values of the stretch stress generated in the first wing is less than values of a stretch stress being generated in the second wing as set forth in col. 9, line 66 to col. 10, line 24.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**.

See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3761

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
